

CAP STAPLERS

STINGER CS150 CAP STAPLER

The **STINGER CS150** provides production builders with proven performance and best practice for securing foamboard as well as roofing felt, synthetic underlayments, and housewrap.

Formerly marketed as the Crossfire® Cap Stapler, the CS150 bumpfires or sequentially shoots 22mm, 32mm and 38mm staples. It's light and easy to maneuver, and the ergonomic design reduces arm fatigue. The clear basket feeds in seconds, and the large capacity means fewer stops to reload.

#0136010
